THE HUMMINGBIRDS COLLECTION

The hummingbird art collection is comprised of Dariana Arias' hummingbird drawings, influenced by the art movement known as Art Nouveau and inspired by nature. This collection is expanding, therefore, as more hummingbirds are created, this gallery will be updated in order to showcase new pieces focusing on these beautiful birds. During the month of June 2023, few selected artworks from this series were successfully showcased at the Homme Art Gallery in Washington D.C. during a 10-year retrospective solo exhibit hosted by aforementioned gallery, encompassing 10 years of Dariana's artistic trajectory. The entire hummingbird collection has not been exhibited in public and it is only available for viewing thru the artist's official website, on her online museum.

Enjoy!
